

Data Scientist, Lead or Mid-level

Washington, DC

full-time or contract-to-hire

Founded in 2013, Tuple Health is a growing healthcare design and technology startup. As the focus of healthcare shifts from reactive treatment to proactive care management, we're helping providers transform how they deliver healthcare. Our tools and recommendations improve quality of care at the scale of physician networks and hospital systems, as well as the individual patient-physician relationship.

We discover, design, and build ways for healthcare providers to deliver better care at a lower cost. Our customers include academic centers, hospital systems and some of the largest oncology practices in the country.

Data Science at Tuple Health

Our data scientists work closely with the rest of the team to develop analyses and user-centered software products that inform the day-to-day decision-making of physicians and hospitals. Healthcare providers need to make evidence-based decisions to improve care delivery; our team helps them identify which patients are at risk and what interventions are likely to help. We address these problems with interdisciplinary collaboration across the whole Tuple Health team.

What You'll Do

At Tuple you will develop a deep knowledge of healthcare data and use it to answer questions on behalf of our clients every day. You might spend the morning meeting with a client outlining their needs and the afternoon reading about healthcare policy implementation, writing code, and running analyses on client data. You will consult with the UX team to prototype the data visualizations and interactions and iterate on them after receiving client feedback. You will also work with the software engineers validating results and transitioning them into our client-facing product.

What We Are Looking For:

- ◆ A commitment to build your skills and be intellectually curious
- ◆ A strong collaborator with a sense of responsibility for the team's collective success
- ◆ An ability to communicate process and analysis decisions clearly
- ◆ Attention to detail
- ◆ Experience using Python or R for data analysis
- ◆ Some experience or familiarity with SQL
- ◆ Experience handling Medicare or other insurance claims data is a plus

What We Offer Full-Time Employees:

- ◆ Medical and Dental Premiums paid at 75%
- ◆ Company Sponsored 401(k)
- ◆ Flexible hours and the ability to work virtually
- ◆ 8 paid holidays and 15+ days PTO
- ◆ Equity
- ◆ Relocation support to move to DC
- ◆ Ability to shape and mold the company as we grow

Tuple Health is an Equal Opportunity Employer where diversity is celebrated. We strive to create an inclusive environment for all employees.
